

```
/*Program to compute the average speed in miles*/
public class AverageSpeed {

    public AverageSpeed() {
    }

    public static void main(String[] args) {
        // TODO code application logic here
        int kilo = 14;
        double minutes = 45.5;
        double mile = kilo/1.6;
        double hour = minutes/60;
        System.out.print("The average speed in miles per hour
        is:\n" + mile/hour + " mile/hour");
    } }
```
