```java
/*Program to find the number of years*/

import java.util.Scanner;
public class Years {

public Years() {
}

public static void main(String[] args) {
// TODO code application logic here
System.out.print("Enter the number of minutes:");
Scanner input = new Scanner(System.in);
double minutes = input.nextDouble();
double year = minutes/(365*24*60);
year = Math.floor(year);
double day = (minutes/(365*24*60)-year)*365;
day = Math.floor(day);
System.out.print(minutes + " minutes is approximately
" + year + " Years and " + day + " days" );
} }
```
